

### 3. Visualized And Data-based Monitoring Solutions

#### — Deep Earth Insights DataTech Company

- Deep Earth Insights DataTech Company specializes in fiber optic technology, offering comprehensive geological reservoir evaluation and development engineering monitoring services that cover the entire oil and gas development process, from drilling and completion to production. These services facilitate detailed evaluations and precise engineering control throughout the oil and gas development process.

#### Visualized Data Monitoring Services

- ✓ **Fiber Optic Monitoring Technology Services**
  - ❑ Fiber Optic Output / Injection Profile Monitoring Service
  - ❑ Fiber Optic Leak/Blockage Monitoring Services
  - ❑ Gas Storage / CCUS / Geothermal Well Permanent Fiber Optic Services
  - ❑ Fiber Optic Fracturing Monitoring Services
  - ❑ Fiber Optic Pipeline Monitoring Services
  - ❑ Permanent Fiber Optic Monitoring Services for Casing Annulus
- ✓ **Digital Rock Technology Services**
  - ❑ Digital Debris Technology Services
  - ❑ Digital Core Technology Services
- ✓ **Logging and Monitoring Technology Services**
  - ❑ Wide-area EM Monitoring Services
  - ❑ Casing Damage Evaluation Logging Services
  - ❑ Horizontal Well Production Profile Logging Services

**Development and Production Require Monitoring!**
