

Anton Oil & Gas Solutions

Enhanced Efficiency AI-Driven Collaboration Platform

Challenges And Our Solution

The biggest challenges facing global oil and gas development is efficiency.

Efficiency In Oil and Gas
Resource Development

Effectively Utilizing of Natural
Gas

Operational Efficiency In
Production

Resource Utilization
Challenges

Anton Oil & Gas Solutions offer:

**A. Oil & Gas Field
Development Efficiency
Solutions**

**B. Natural Gas Utilization
Efficiency Solutions**

**C. Oil & Gas Development
AI Enablement**

D. Oil & Gas Market Place

Enhanced Efficiency AI-Driven Collaboration Platform

- ◆ **As an oilfield technology service provider, Anton offers:**
 - **A.1 Products and Services**
 - **A.2 Reservoir Performance Enhancement Solutions**
- ◆ **As an integrated oil and gas field development service provider, Anton delivers:**
 - **A.3 Oilfield Management Services**
- ◆ **For marginal oil and gas fields that clients find challenging to develop, Anton engages in:**
 - **A.4 Oil and Gas Resource Development**
- ◆ **Across the full lifecycle of oil and gas exploration and development, Anton offers:**
 - **A.5 Oil and Gas Development Research**

Unlock the Full Potential of Your Oil and Gas Assets!

A.1 Products and Services

Full range of technical services, including integrated services and customized solutions.

Drilling Engineering Technology

- Drilling, directional drilling, cementing, well stabilization, and logging technology
- Integrated drilling and completion general contracting technology services

Downhole Operations

- Fracturing Pumping and Stimulation
- Coiled Tubing Services
- Workover Services
- TRS Services
- Well Testing Services
- Shut-in Well Restoration Services

Two Operations, Two Products

Completion Products and Technologies

- Full range of completion tool products
- Integrated completion technology services
- Intelligent completion and water control services
- Artificial lift products and services

Chemical Products and Technologies

- Station and Gathering Chemicals & Services
- Refining Chemicals & Services
- Drilling and Completion Chemicals & Services
- Stimulation Chemicals & Services
- General Bulk Chemicals

Lean Operations, Ultimate Experience!

A.2 Reservoir Performance Enhancement Solutions

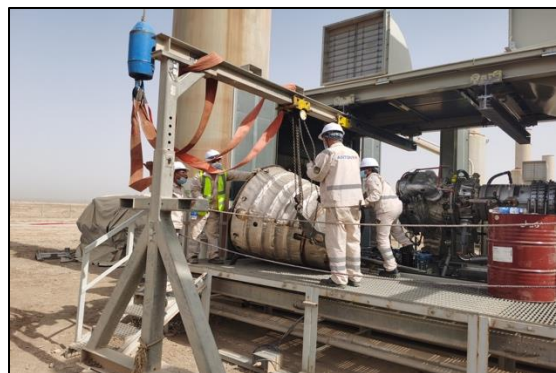

Full-lifecycle production optimization through customized solutions.

Tailored Services, Exceptional Results!

A.3 Oilfield Management Services

We provide comprehensive field operations, maintenance, and personnel solutions—leveraging full-spectrum E&P expertise and global talent to maximize productivity while ensuring safe, stable, and efficient performance.

1. Operations & Maintenance (O&M)

□ Iraq

- Al-Ahdab Oasis Field Station O&M
- Halfaya CPF Facility Management
- KEC Block 9 Integrated O&M

□ Turkey Gas Storage Surface Facility Commissioning & O&M

□ China (Xinjiang) Yuli LNG Plant Startup & O&M

2. Supervision & Workforce Solutions

□ Iraq: East Baghdad Field Technical Staffing / Oasis Supervision Services

□ Africa: CNPCIC & OPIC (Chad) Personnel Support

□ Niger: CNPCNP Technical Workforce

□ Canada: Cener Tech Manpower Services

Oil And Gas Development, Simple And Efficient!

A.4 Oil and Gas Resource Development

Leveraging technology, financing, and innovative business models, we invest as a partner to co-develop oilfields, share risks and rewards while maximizing asset value through collaboration.

Partnership

Collaborative Development

1. The partner holds the mineral rights.
2. Anton invests in the development.
3. Anton assumes full responsibility for production and operations.

Asset Transfer

1. Acquisition of equity and takeover of the oilfield.
2. Investment in development.

Competitive Advantages:

- ✓ Expert in Field Management
- ✓ Proven Technical Expertise
- ✓ Integrated Resource Mobilization
- ✓ Strong Financing Capabilities

Targeted Resources:

- Mature Oil & Gas Fields
- Small-to-Medium Oil & Gas Fields
- Marginal Oil & Gas Fields

Success Cases:

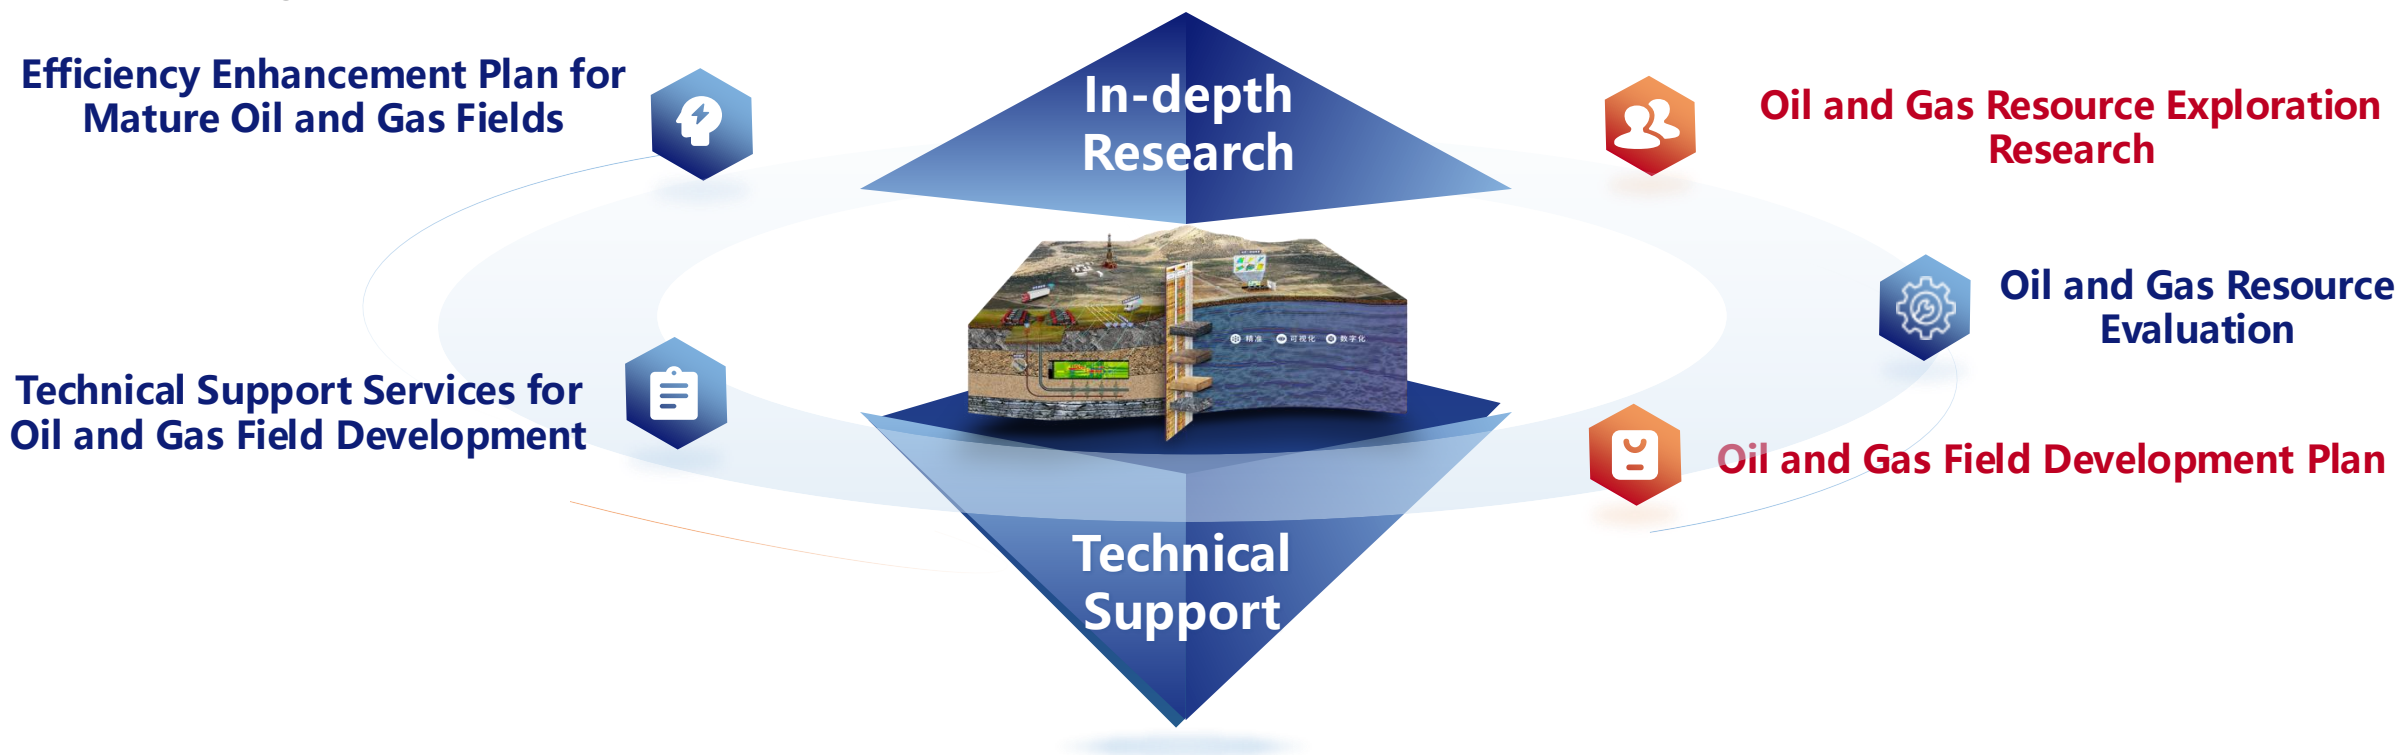

- Dhufriyah Field Development, Iraq
- Majnoon Field Management, Iraq

Specialized Solutions, Waste to Worth.

A.5 Oil & Gas Development Research

The Research Institute offers lifecycle research services for oil and gas fields, covering exploration, resource evaluation, development planning, and technical support.

Specializing in marginal, small-to-medium, and late-stage fields, the institute combines global expertise with innovative, cost-effective solutions. It supports Anton's operations while sharing knowledge with global clients and long-term partners.

Precision Research, Breakthrough Development.

◆ **As a provider of natural gas development services, Anton offers**

- **B.1 BOT Investment and Leasing Services for Surface Assets**
- **B.2 Special Equipment & Services**
- **B.3 Project Design and Management**

◆ **As a natural gas resource operator, Anton is committed to the efficient utilization of natural gas resources, with a focus on unlocking the value of marginal gas reserves that are challenging for clients to develop economically.**

- **B.4 Natural Gas Value Chain Efficiency Solutions**

Maximizing the Value of Natural Gas Resources for Clients!

B.1 BOT Investment and Leasing Services for Surface Assets

Anton invests in and constructs various surface assets for clients, including gas processing facilities, construction equipment, and other assets. Through BOT/BOO, financial leasing, and operational leasing, clients can utilize assets without upfront investment, enabling production.

For Oil And Gas Development, Everything Is Leasable!!

B.2 Special Equipment & Services

Anton offers specialized technical equipment for natural gas processing, along with customized equipment services and modular skid-mounted solutions.

Key Technical Equipment

Separator Skid

*Anti-sulfur
Generator*

Gas Turbine

*Desulfurization
Equipment*

*Decarbonization
Equipment*

Mixing Pump

Customized Equipment Services:

Modular Skid-mounted Solutions + Global Delivery

Custom Solutions, Fast and Efficient!

B.3 Project Design and Management

Anton provides integrated services for natural gas processing and utilization projects, including design, construction, integrated management, and maintenance. By leveraging new technologies, we enhance overall project efficiency.

Customized Facility Design And Innovation Capabilities

- ✓ Full value chain technical support for deeper industry expertise
- ✓ Global experience in natural gas processing and utilization projects
- ✓ Joint innovation with clients to address core challenges
- ✓ Design + project management focused on efficiency improvement

Project Design + Integrated Management

Natural gas processing stations

Natural gas storage facilities

Natural gas transportation facilities

Innovative Engineering, Integrated Efficiency!

B.4 Natural Gas Value Chain Efficiency Solutions

Anton Natural Gas Utilization Company integrates the entire industry chain and introduces downstream users to convert various natural gas resources into pipeline gas, LNG, electricity, and computing power, focusing on marginal gas resources.

Issues Addressed: Inefficient utilization of natural gas.

**Services Provided: Integration of the entire industry chain.
Introduction of downstream users to commercialize natural gas.**

**Targeted
Resources:**

Flare gas

Scattered
gas

Marginal
gas

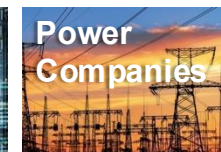

Small and
medium-
sized gas
fields

1. Natural Gas Conversion Services

2. Gas Consumer Introduction Services

Low-Efficiency Gas? A Full-Chain Solution!

Anton's AI solutions enhance oil and gas development through three implementation scenarios: surface facility optimization, subsurface reservoir enhancement, and operational management innovation.

- | | |
|--|--|
| 01 Digital Oilfield Integrated Solution | 02 Equipment and Facility Inspection |
| 03 Reservoir Visualization and Datafication Monitoring | 04 Industry AI Solutions |

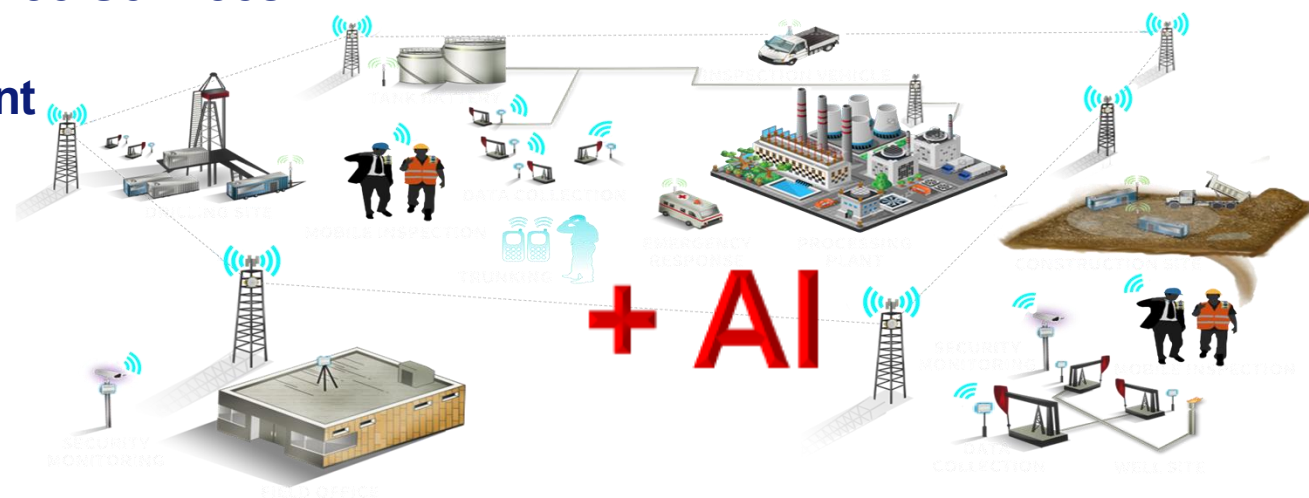

AI Solutions for Real Scenarios!

C.1 Digital Oilfield Integrated Solution

Anvision

Anvision delivers professional accompanying services for all oilfield scenarios, ensuring the most reliable project implementation, fastest cycle times, and lowest costs to meet oilfield development and production efficiency needs.

- Intelligent Oilfield Solutions
- Consulting, Construction, and Maintenance Services
- Customized Digital Platform Development
- Digital Multimedia Services

Oil And Gas With Digital Intelligence – Simple And Feasible!

C.2 Equipment and Facility Inspection

Through data acquisition and intelligent analysis of oil and gas equipment and facilities, T-All Inspection provides full-lifecycle testing and monitoring services for clients in the oil and gas industry.

Services Offered:

- Asset Integrity Management Services
- Drilling Tools and Equipment Inspection Services
- Tubing & Casing Inspection Services
- Engineering Construction NDT Services
- Offshore Platform Equipment Inspection Services
- Processing Facilities Inspection Services
- Pipeline Inspection Services
- Inspection of Renewable and Clean Energy Equipment and Facilities
- Measuring Instrument Calibration Services

T-ALL Inspection is a leading and internationally competitive third-party inspection service group in China's oil and gas sector.

Oil & Gas Assets, Inspection Required!

C.3 Reservoir Visualization and Datafication Monitoring **ANTON 安東**

Deep Earth Insights Data Technology (a member of Anton Group) delivers reservoir lifecycle full-spectrum monitoring services for oil & gas development, with fiber-optic solutions as our signature technology.

1. Fiber Optic Monitoring Services

- Production dynamics monitoring
- Integrity monitoring
- Wellbore lifecycle monitoring
- Pipeline monitoring

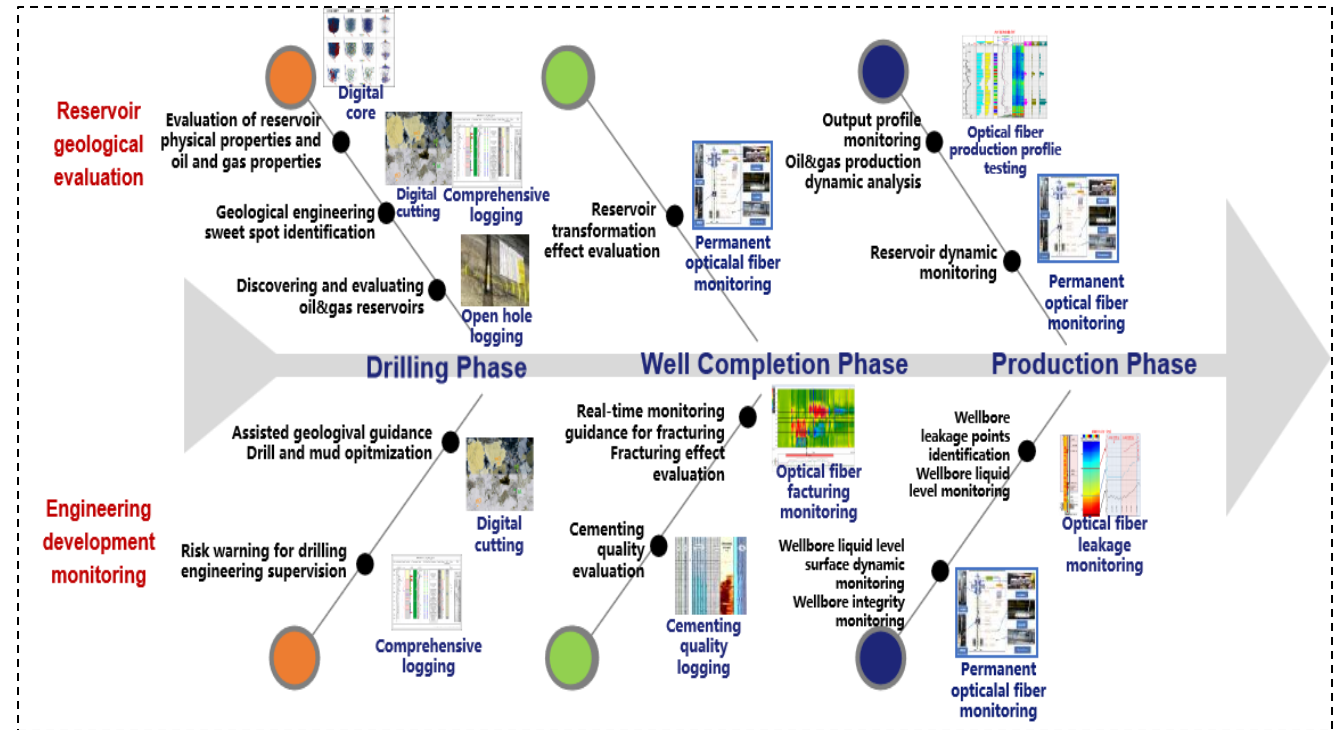

2. Digital Cuttings Services

- Drilling engineering support
- Geo-mechanical sweet spot evaluation
- Fracturing development optimization

3. Construction Monitoring Services

4. Logging Services

- Downhole camera logging

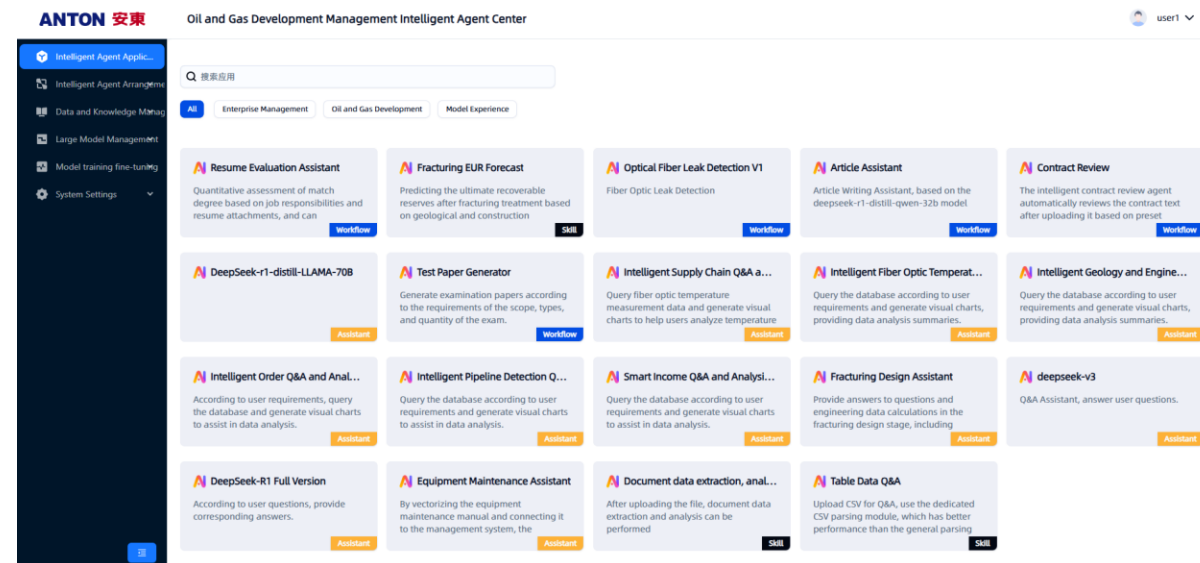

Reservoir Lifecycle Monitoring and Data Services

Development And Production Require Monitoring!

C.4 Industry AI Solutions

Anton AI Research Institute specializes in AI solutions in oil and gas industry, integrating intelligent technologies into the entire exploration and production process to enhance operational efficiency and enable digital transformation.

- AI Transformation Solutions
- Intelligent Oilfield Software & Development Services
- Multimedia Services

Smart Oil & Gas Intelligence!

□ Industry-Wide Collaboration

Offerings:

- Strategic Partnerships
- Alliance Partnerships
- Full-Field Partnerships
- Platform Services

Anton Oil & Gas Technology Co., Ltd. is committed to building an integrated online resource-sharing platform for the oil and gas industry:

1. Global Network:

- 8,000+ resource partners worldwide
- 130+ fully certified commercial channel partners
- Procurement services completed for 2,500+ clients through the platform

2. Digital & Logistics Infrastructure:

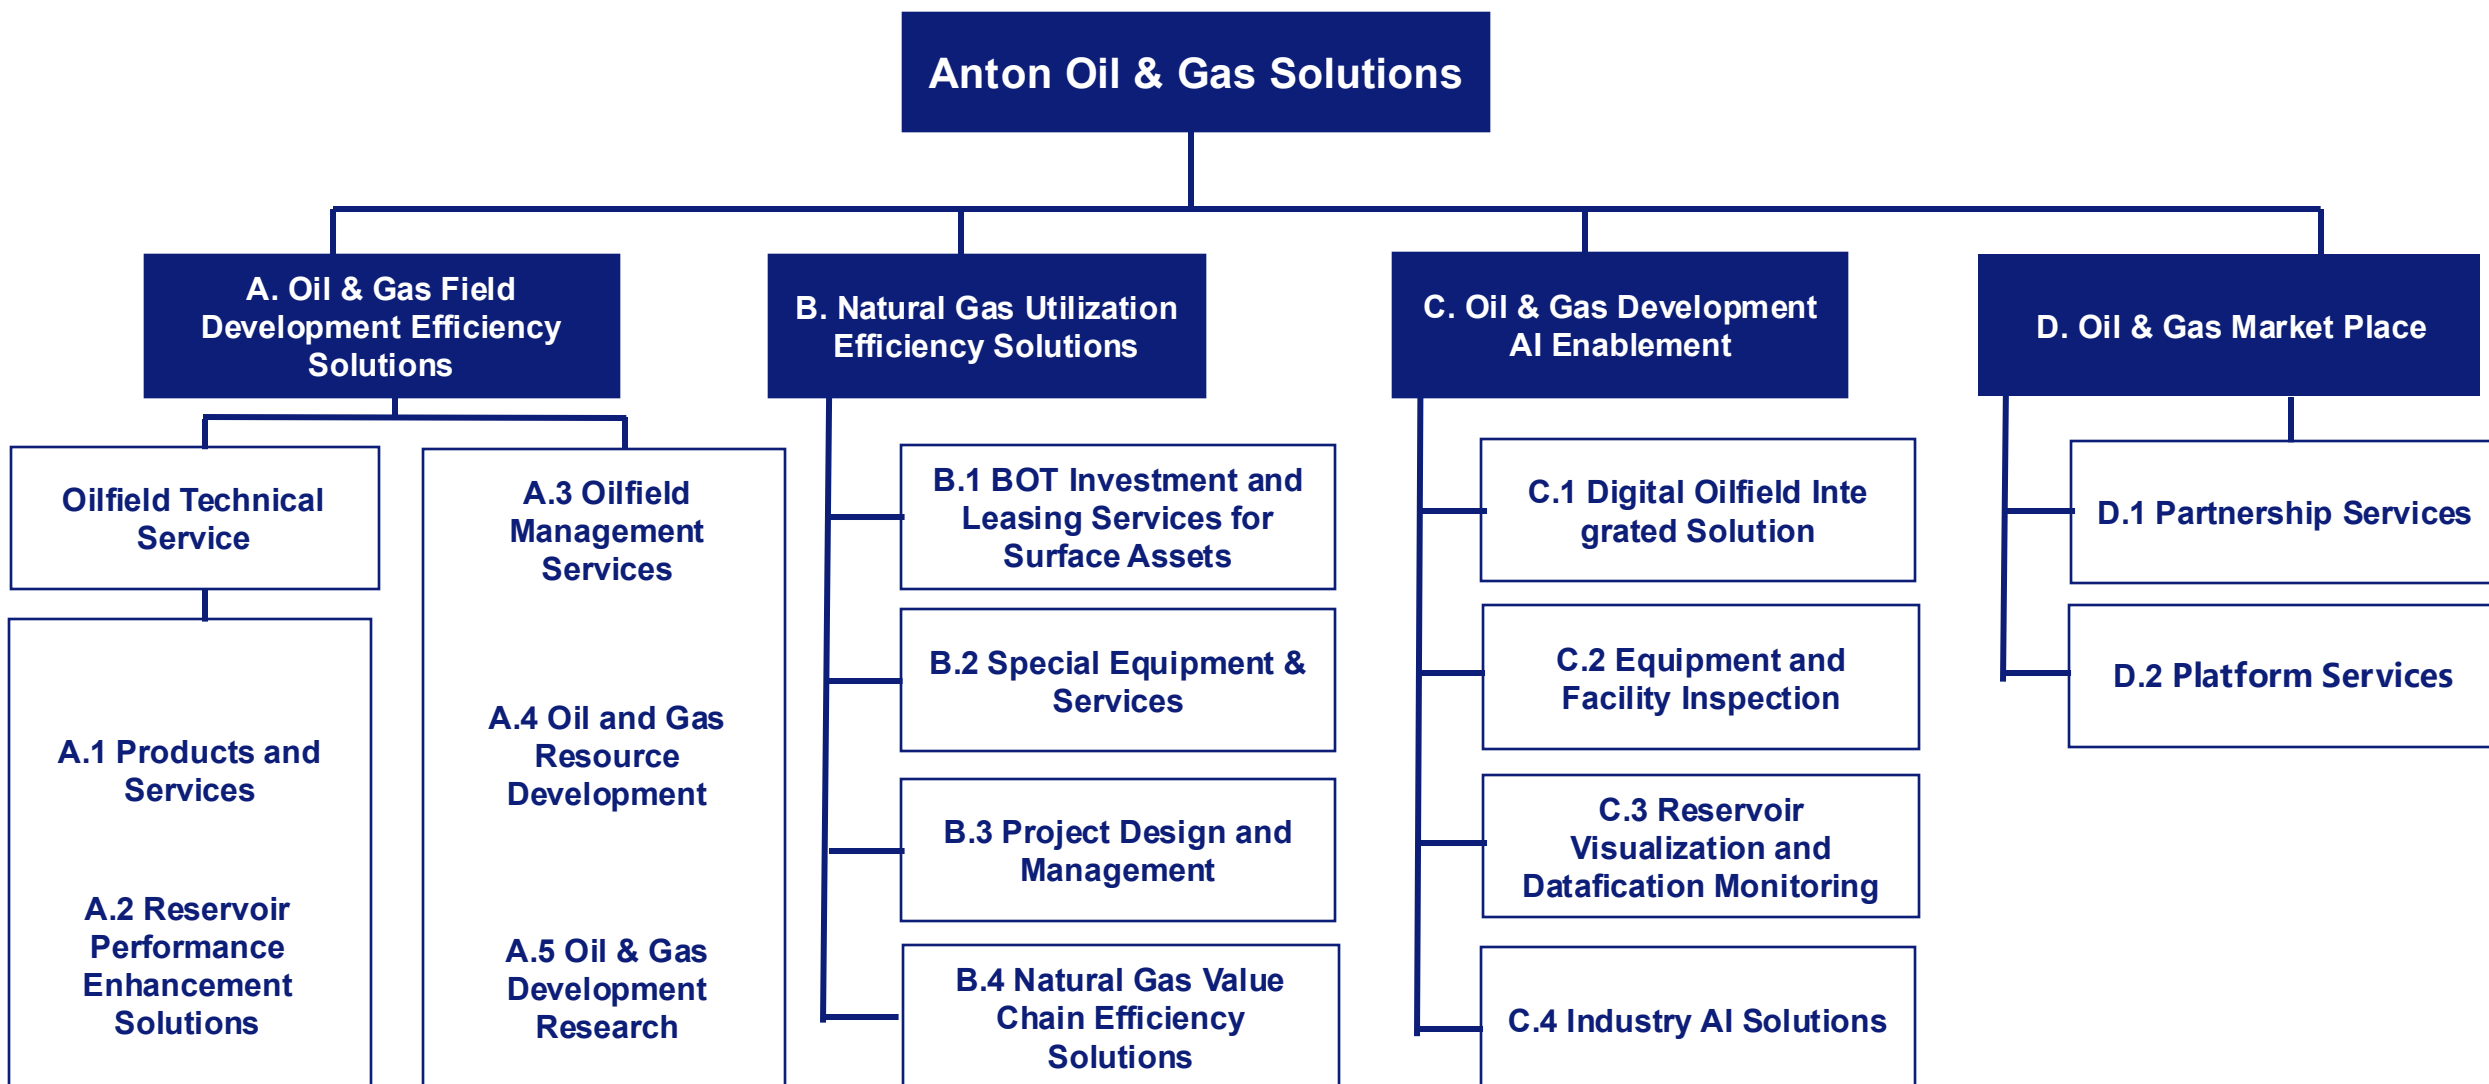

- E-commerce platforms + marketing & logistics bases in 30+ countries

3. Financial Services:

- Working capital financing for partners
- Investment for high-potential ecosystem enterprises

Global Oil & Gas, Platform Collaboration!
