

ANTON 安東

Oil & Gas Value Management Integrated Services

Anton Industry Solutions

The primary challenge facing the global oil & gas industry is efficiency.

Low efficiency in
oil & gas development

Natural gas is difficult
to utilize efficiently

Two Scenarios

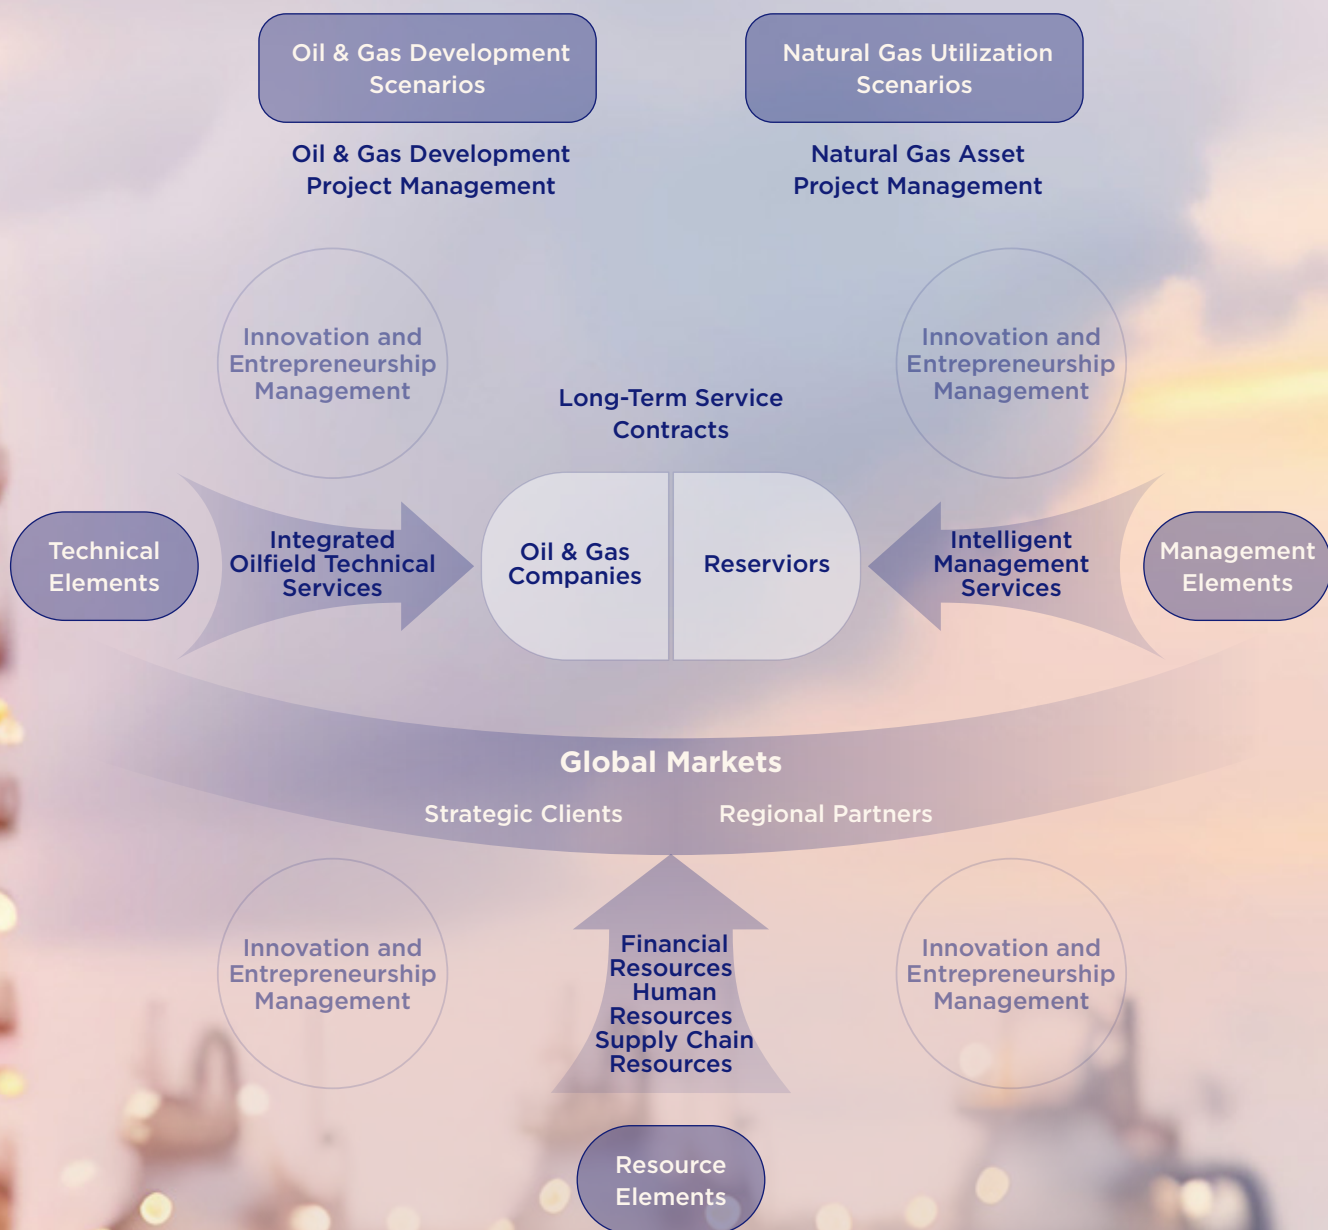

Lack of
technology

Lack of
management

Lack of
resources

Three Elements

Oil & Gas Value Management Integrated Solution

1

Integrated Oilfield Technical Services

Combining reservoir study and engineering, tailor made, from well construction to production, helping clients optimize Capex and achieve lean operations.

1.1 Drilling

1.2 Downhole Operations

1.3 Completion

1.4 Reservoir Enhancement

1.5 Reservoir Visualization Monitoring

1.6 Oilfield Technology Research

1.1 Drilling

Full-scope drilling services. Successfully executed multiple integrated drilling and completion projects in China, Kazakhstan, Pakistan, Iraq, and other countries, with over 350 wells completed to date.

Full-Scope Drilling Services

**Drilling
Engineering
Technical
Services**

**Drilling Engineering
Services**

**Drilling Fluids
Services**

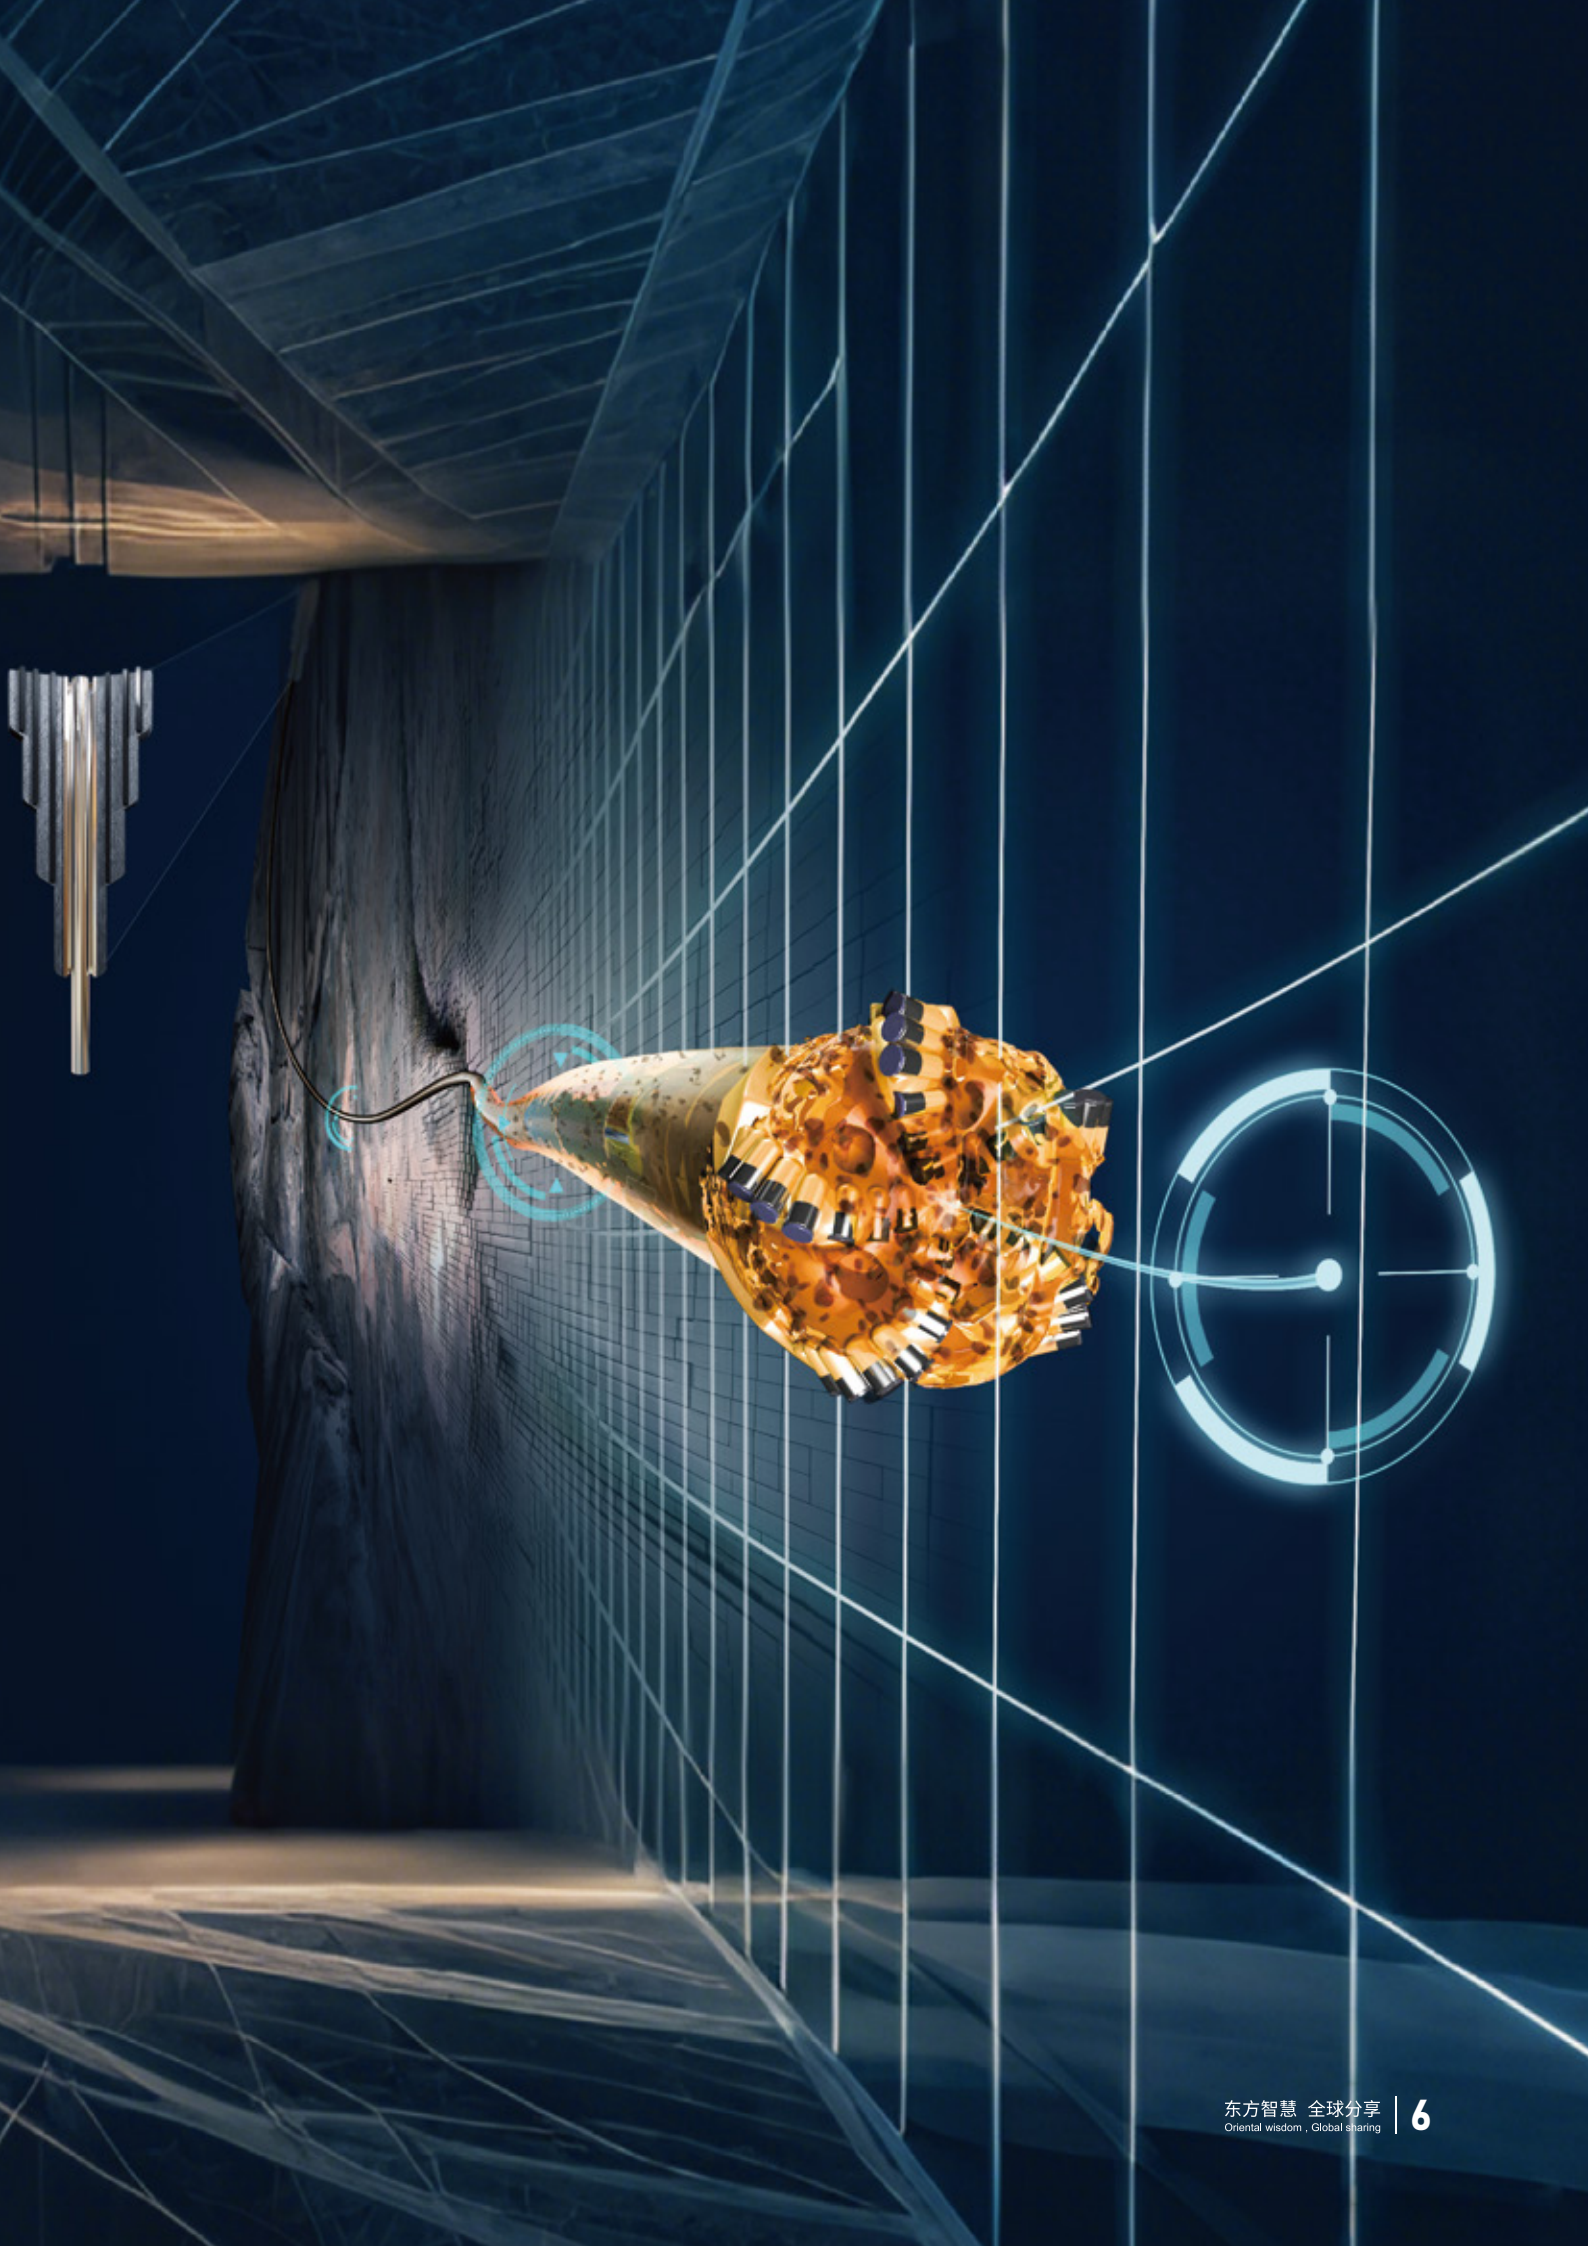

**Directional Drilling
Services**

**Cementing
Services**

**Faster and Better Drilling,
Higher Efficiency,
Lower Cost!**

1.2 Downhole Operations

Product Lines:

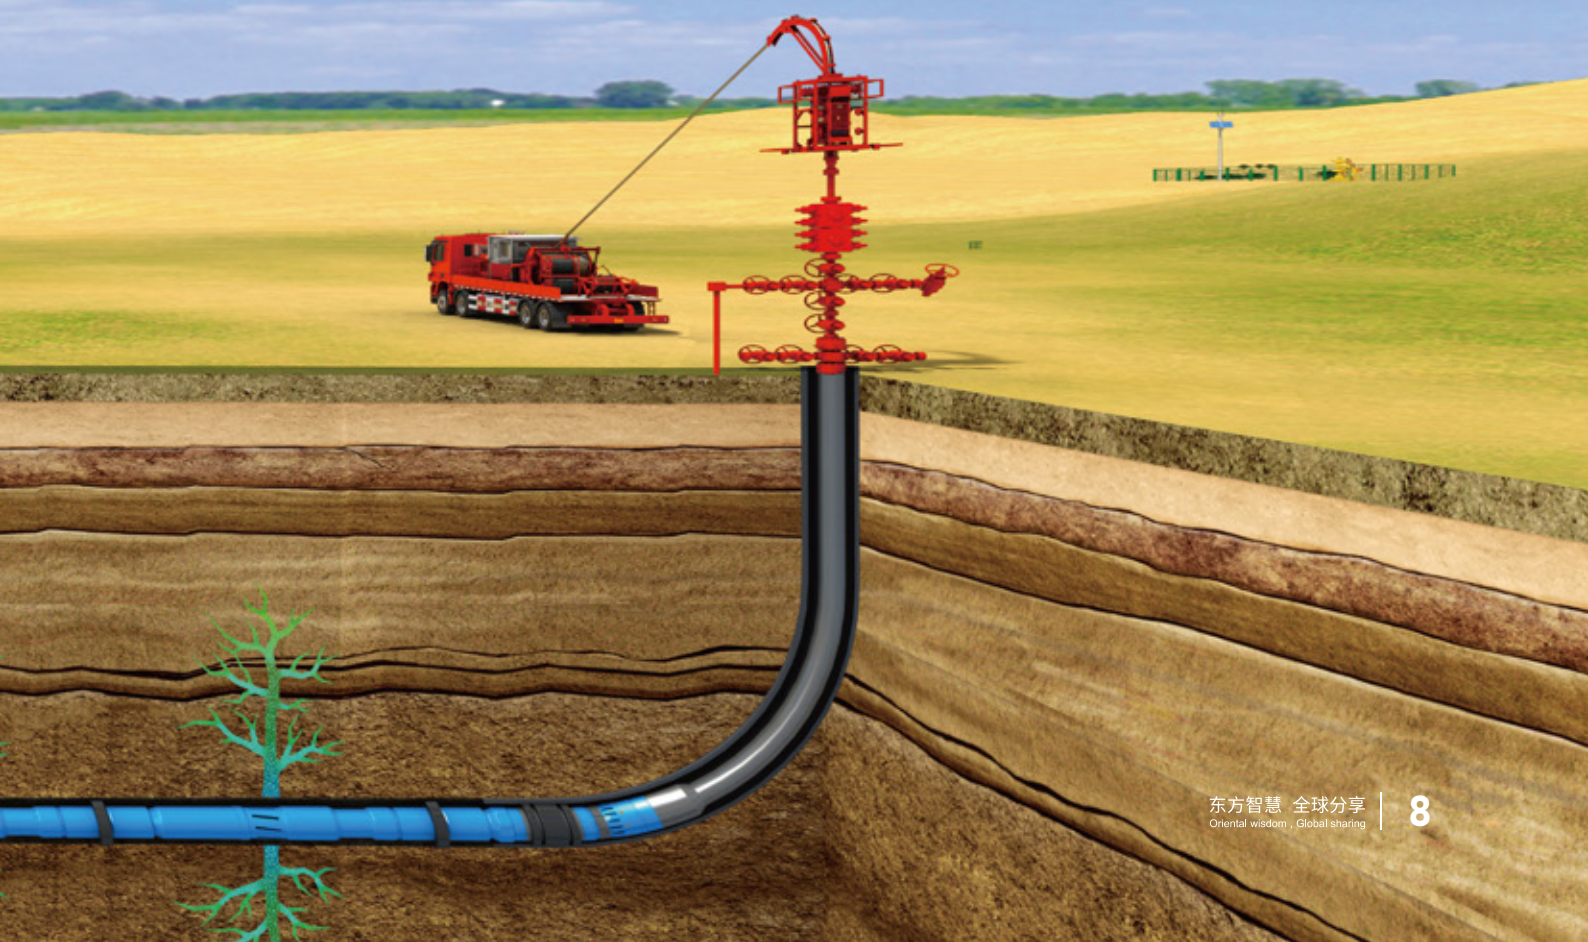

- **Well Service and Testing**
- **Coiled Tubing**
- **Fracturing**

Integrated Technical Solutions:

- **Turnkey Well Service and Completion Service**
- **Rigless Integrated Service**
- **Comprehensive Management for Old/Inefficient Wells**

Integrated Downhole Operations, Extending Wellbore Life!

1.3 Completion

From Completion Tools to Intelligent Injection and Production

Completion

- Completion Tools
- Sand Control
- Artificial Lift
- Wellhead Equipment
- Water Displacement and Gas Production
- Water Control
- Smart Injection and Production
- Fracturing Tools

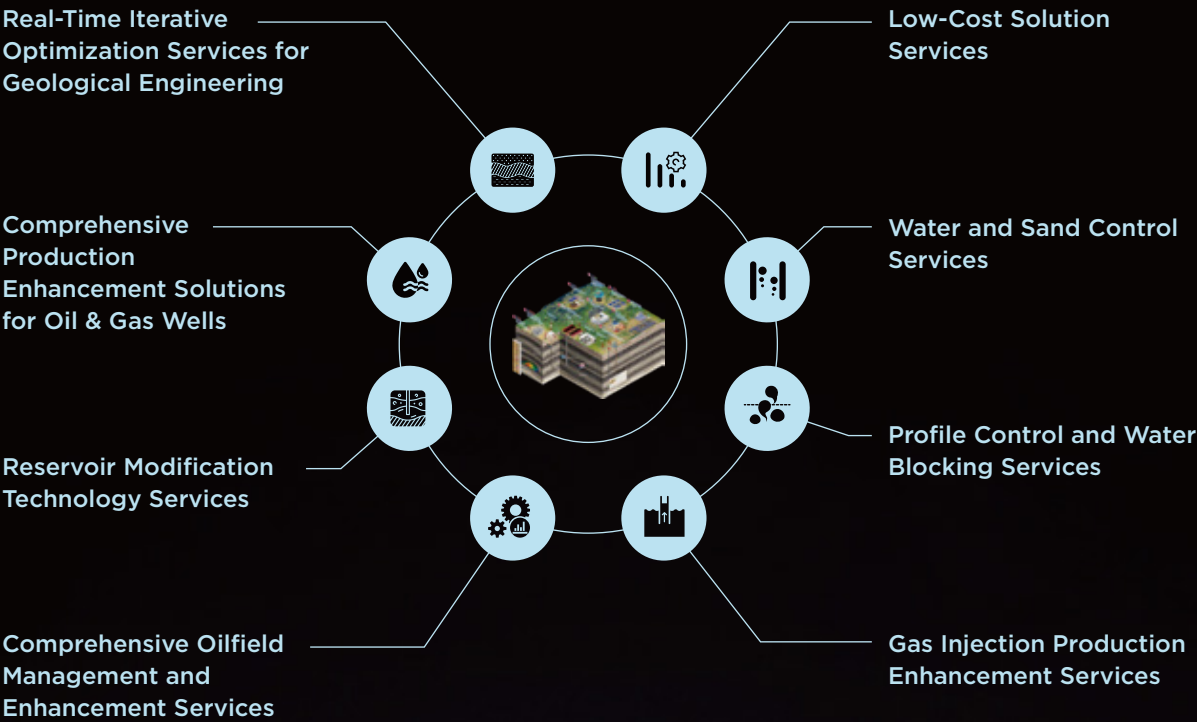

Exceptional Completion, Making Oil & Gas Production More Efficient!

1.4 Reservoir Enhancement Services

Customized Services for Enhanced Reservoir Performance!

1.5 Reservoir Visualization and Data-Driven Monitoring Services

Deep Earth Intelligence leverages fiber optics to deliver comprehensive, full-lifecycle monitoring services for oil & gas development.

Fiber Optic Monitoring
Technical Services

Digital Rockfall
Monitoring Services

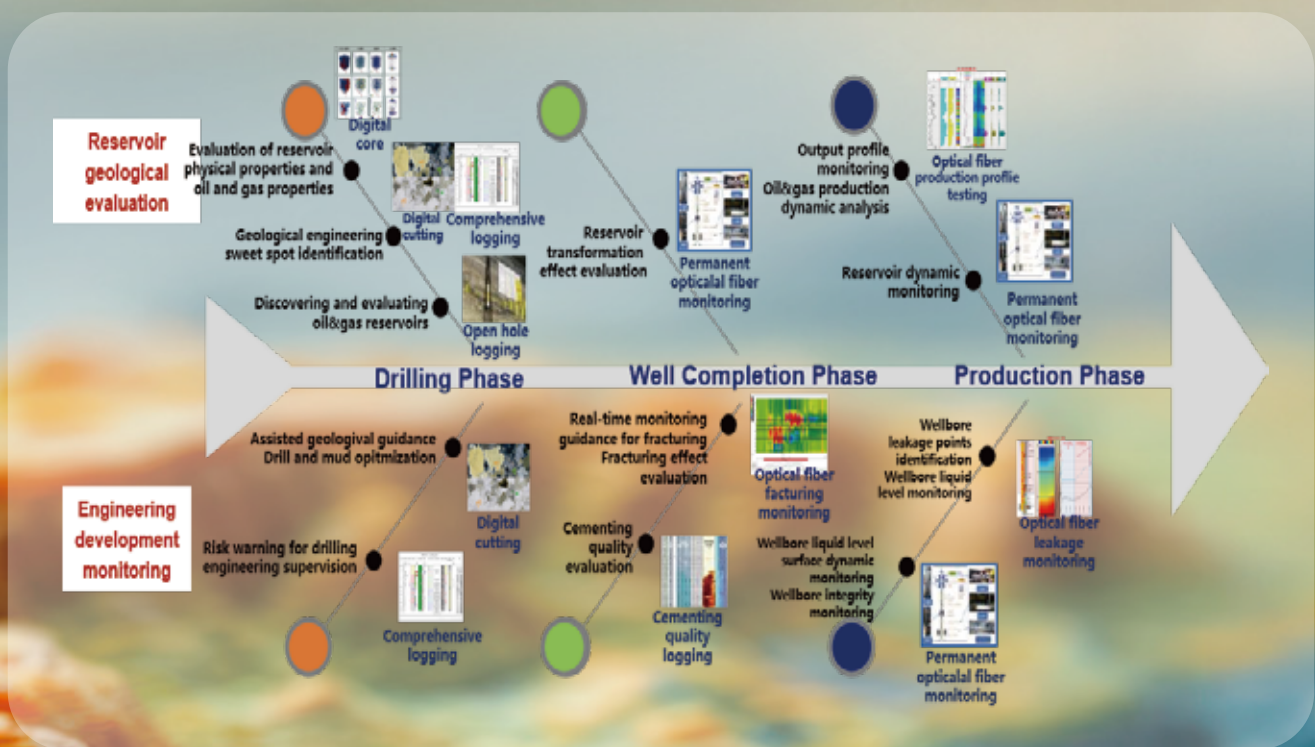

Engineering Monitoring
Services

Logging Services

Development and Production Require Monitoring!

Reservoir Full Life Cycle Monitoring and Data Services

1.6 Oilfield Technology Research

Exploration

- Reservoir System Research
- Geophysical Exploration Techniques
- Reservoir Prediction and Evaluation
- Resource Assessment

Development

- Reservoir Engineering Research: Development Well Network Design
- Drilling and Completion Engineering
- Surface Facilities Construction
- Economic Evaluation Technology Research

Full-Chain Technology, Empowering Oil & Gas!

Production

- Production Management: Dynamic Monitoring; Production Optimization
- Production Enhancement Measures: EOR Technologies, Fracturing and Acidizing
- Digital Technologies: Smart Oilfield Technologies

Discontinuation and Transformation

- Well Abandonment
- Asset Transformation (CCUS, Geothermal Utilization)

2

Intelligent Management Services

Managing operations intelligently, helping clients reduce operational costs and enhance efficiency.

5.1 Oilfield Management

5.2 Digital Oilfield

5.3 Inspection

5.4 AI Solutions

2.1 Oilfield Management Services

AOM employs 4,000 operations and maintenance personnel, managing 1 million barrels of crude oil production per day across the Middle East, Africa, Southeast Asia, and China.

Operations and
Maintenance:

- **Al-Ahdab Oil Field Facility, Iraq**
- **Halfaya CPF, Iraq**
- **Iraq KEC Block 9**
- **Tuz Gölü Underground Gas Storage Surface Facilities, Turkey**
- **Yuli LNG Plant, Xinjiang, China**

Oil & Gas Development, Simple and Efficient!

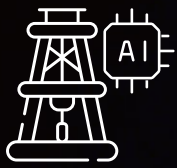

Supervision and
Inspection:

- East Baghdad, Iraq
- Iraq Oasis
- CNPCIC & OPIC, Chad, Africa
- CNPCNP, Niger
- Harbour Energy, Canada

Integrated Oilfield
Management:

- Majnoon Oil Field, Iraq
- OPIC Oilfield, Chad

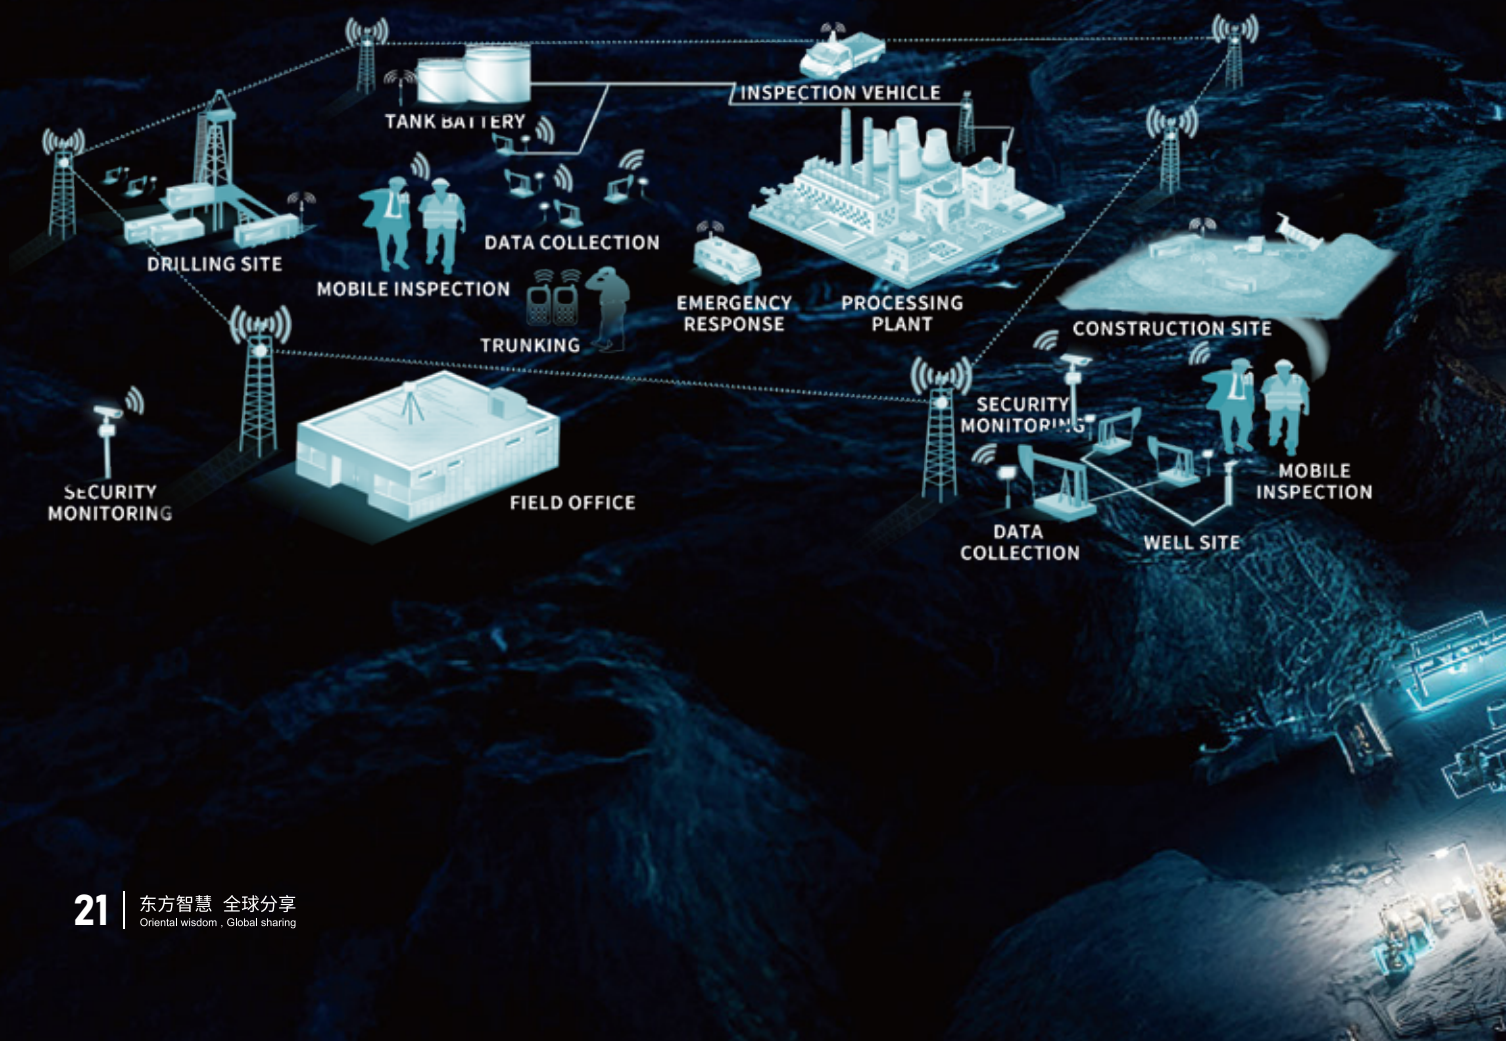

2.2 Comprehensive Digital Oilfield Solutions

Anton's partner - Anvision

- **Comprehensive Digital Oilfield Solutions**
- **Digital Oilfield Consulting, Construction, and Operations & Maintenance Services**
- **Customized Digital Platform Development Services**

Digital Intelligence for Oil & Gas —Simple and Easy!

2.3 Equipment and Facility Inspection Services

Anton's partner - TALL Inspection, is China's largest and most internationally competitive third-party inspection service group in the oil & gas sector.

- Oil & Gas Field Asset Integrity Management
- Drilling Tools and Drilling/Production Equipment Inspection
- Casing and Tubing Inspection
- Oil & Gas Engineering Equipment and Facility Inspection
- Offshore Platform Equipment and Facility Inspection
- Oil & Gas Field Station Inspection
- Oil & Gas Pipeline Inspection
- New Energy Equipment and Facility Inspection
- Oil & Gas Metering Instrument Inspection

All Oil & Gas Assets Must be Inspected!

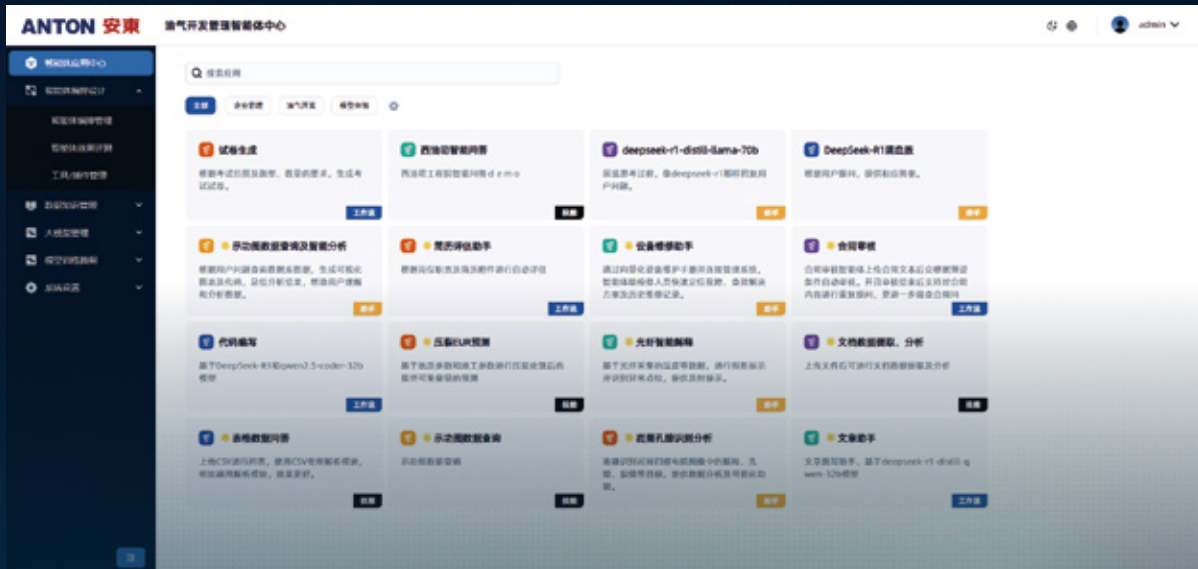

2.4 AI Solutions for Oil & Gas

- **AI Transformation Solutions**
- **Smart Oilfield Software Products and Development Services**
- **Multimedia Services**

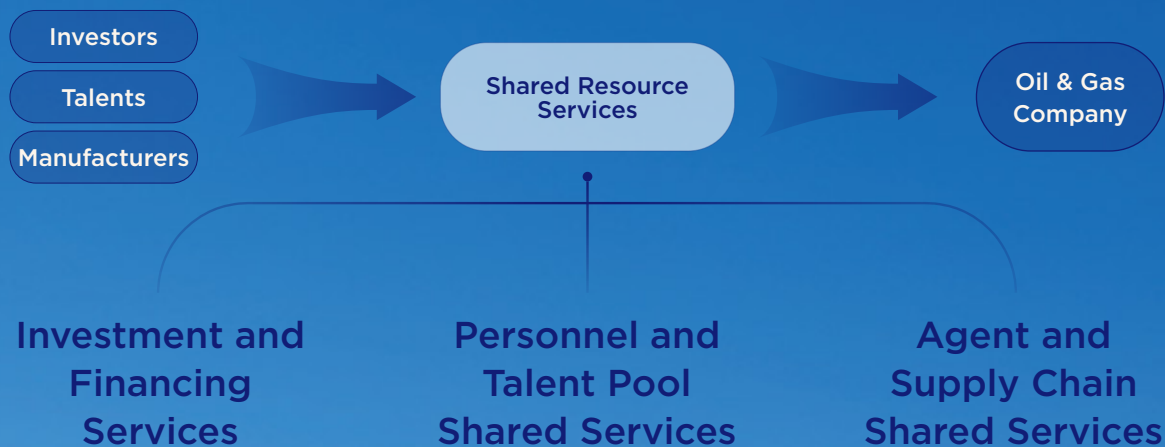

Digital Intelligence in Oil & Gas

3

Shared Resource Services

Helping partners secure capital, top talent, and global supply chains.

3.1 Engineering and Technical Services

3.2 Reservoir Performance Enhancement

3.3 Oil & Gas Technology Research

3.1 Financial Resources

Global Capital Markets, Major Financial Institutions,
Professional Funds

Investment and
Financing Partners

Investment Promotion and
Project Management

Anton Global Oil & Gas Investment and Financing Platform

Project Financing Services
Financial Resource Sharing

Oil & Gas Resource Owners
Global Oil & Gas Resources

3.2 Human Resources

Over **30,000** employees worldwide, with a talent pool exceeding **60,000**

External human resources partners

**Human Resource
Partners**

Job Opportunities

Anton Global Oil & Gas HR Service Platform

**Talent Services
HR Shared Services**

**Oil & Gas Resource Owners
Global Oil & Gas Resources**

5.4 Supply Chain Resources

Over **8,000** resource partners, and more than **130** qualified commercial channel companies worldwide

Supply Chain Partners

Global Sales Agency

Anton Global Oil & Gas Supply Chain Collaboration Platform

Global Procurement
Services

Oil & Gas Resource Owners

4

Natural Gas and New Energy Asset Management

Providing infrastructure to enable the
commercialization of natural gas and new
energy.

Helping Clients Maximize the Value of Natural Gas Resources!

4.1 Natural Gas New Process Asset

4.2 Platform Shared Asset

4.3 BOT

4.4 Natural Gas Utilization Investment

4.1 Natural Gas New Process Asset Services

Natural Gas New Process Asset Services:

Enhance your entire process efficiency through specialized technical services

Specialized Technology, Reduced Investment!

New Process Assets

Optimize
Collection

Optimize
Processing

Optimize Storage
and
Transportation

Optimize
Utilization

Mixed-flow pump

Supersonic skid

Vehicle-mounted
LNG production
equipment

Sulfur-resistant
generator

4.2 Platform Shared Asset Services

Platform-shared asset services enable efficient management and utilization of assets in natural gas production, allowing you to access assets without heavy investment.

Share Assets, No Investment Required!

Anton

BOO
(Build, Own, Operate)

**Rent as needed,
return when done**

Client

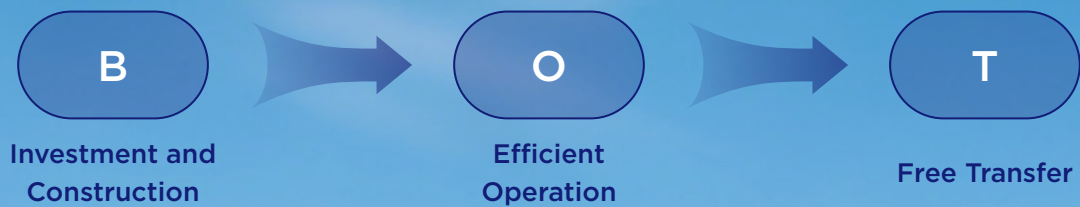

4.3 BOT Services

BOT services enable you to acquire assets directly without fixed investments, efficiently managing your large-scale assets.

Large-Scale Assets, Invested for You!

BOT Services

**No Investment Required from Clients
Directly Acquire Assets**

Natural Gas Processing Facility BOT

4.4 Natural Gas Utilization Project Investment

We unlock the value of your low-efficiency gas, turning it into a direct revenue-sharing opportunity.

Inefficient Natural Gas, Full Industry Chain Solutions!

Natural Gas Utilization

Underutilized
Natural Gas

Anton
Acquires

Full-chain services, upstream
to downstream

Anton provides
full-industry-chain services

High-Value
Commodities

Anton sells
commodities, sharing
profits with clients

Power generation,
computing power, LNG

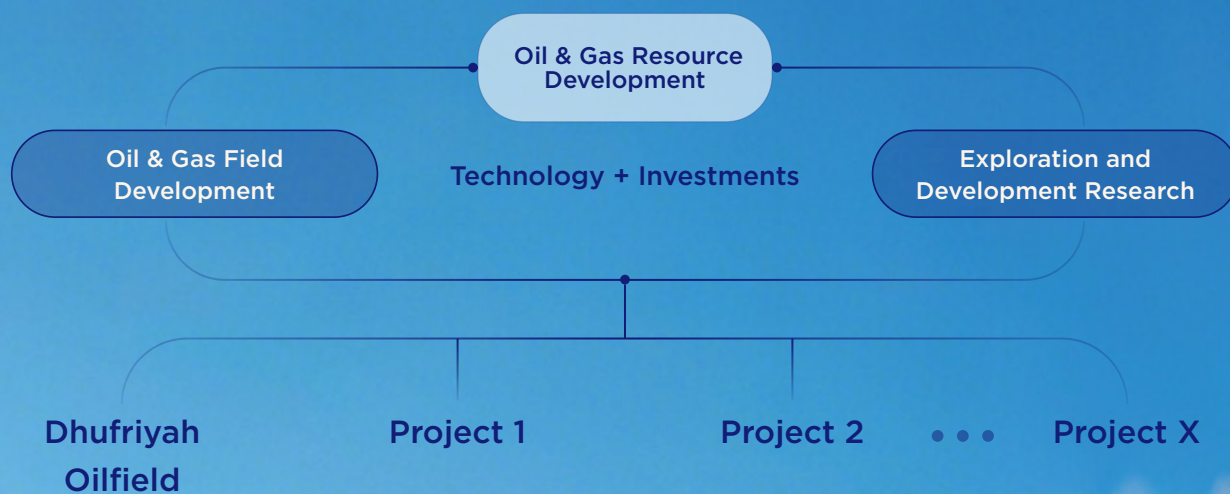

5

Oil & Gas Development Services

Combining technology and capital, helping clients maximize asset value and share in value creation.

Technical Service Provider, Efficient Oil & Gas Development!

3.1 Oil & Gas Development

3.2 Exploration and Development Research

5.1 Oil & Gas Development

Anton acts as the operator to unlock challenging reserves that international oil companies struggle to develop. We apply proprietary technology and autonomous operations to maximize recovery and create value from your assets.

Technical Service Operators

Cooperative Development

1. Party A holds mining rights
2. Anton invests
3. Anton fully responsible for production and development

Property Rights Transfer

1. Purchase equity to acquire oilfield operations
2. Invest in development

Turning Waste into Treasure!

Unique Advantages:

- Integrated oil & gas field development services
- Global resources with lower ownership costs than competitors
- Unique oil & gas field development technology system
- Mobilizes China's top-tier talent and resources

Target resources:

- Mature oil & gas fields
- Small and medium-sized oil & gas fields
- Marginal oil & gas fields

Notable Success Stories:

- Development of the Dhufriyah
- Oilfield in Iraq

5.2 Exploration and Development Research

Anton drives efficient oil block development through technology and autonomous operations. We target global project opportunities—from risk exploration to late-stage EOR—and specialize in tail-end, marginal, and mid-scale fields through our specialized research institute.
